Banish Blemishes Permanently

Give your skin a fresh start

No amount of makeup can recreate porcelain perfection. Instead of letting acne cast a shadow on your confidence, nip it in the bud. This revolutionary radiofrequency micro-needle banishes acne permanently. You'll experience minimal discomfort, no downtime, no redness and no scabs! Your skin will look crystal clear and smooth as satin.

Acne Explained

Did you know that acne is an inflammatory disorder of the hair follicle arising from sebaceous glands? If the sebaceous gland is destroyed, any acne in that area goes away and stays away.

Breakthrough Technology
Featuring a cutting-edge radiofrequency micro-needle with a special wave, this treatment destroys sebaceous glands without injuring the rest of your skin tissue. It even minimises blackheads and pores. You can finally bid farewell to imperfections and problem skin forever.

Frequently Asked Questions

Why is this treatment so effective?

It targets the root of the problem. Because acne is an inflammatory disorder of the hair follicle arising from sebaceous glands, these sebaceous glands are destroyed to effectively reduce acne. Skin regains purity and clarity.

Will acne reoccur?

Once the sebaceous gland is destroyed, acne subsides and is unlikely to recur. Less than 10% of acne recurred within a year after the final treatment session*, making this the ultimate long-term cure for acne.

Is it painful?

Topical anaesthetic cream is applied prior to treatment, so you will experience minimal discomfort.

Are there any side effects?

This treatment is not only safe – it minimises damage to surrounding skin. You may notice mild redness and dryness, however, these typically fade within several days.

How long does it take?

Each session takes 30-60 minutes, and treatment can usually be completed after 2-3 sessions, with a one-month interval in between treatments.

**Achieve
Porcelain
Perfection
Today!**

STEP 1:
Excess sebum
is extracted from
hair follicles.

STEP 2:
A micro-needle
is inserted into
sebaceous glands to
destroy them
with a special
electrical wave.

STEP 3:
Any debris and
impurities are
removed for
immaculate skin.
